UI/UX DESIGNER | FRONT-END DEVELOPER

PROFESSIONAL SUMMARY

UI/UX Designer & Front-End Developer with a creative approach to transforming client visions into engaging and functional web and mobile applications. Experienced in designing prototypes and user-centered interfaces, then translating them into responsive digital experiences. Committed to delivering quality, visually compelling solutions that align with client goals and user needs.

PROFESSIONAL EXPERIENCE

BidaBoss Inc. | Pasig City, Philippines

UI/UX Designer & Front-End Developer | Apr. 2026 - Aug. 2026

- Design and prototype client-driven web and mobile applications based on project requirements, business goals, and user needs.
- Develop high-fidelity prototypes and wireframes in Figma, presenting design concepts for client and supervisor review and approval prior to implementation.
- Translate approved designs into responsive and functional interfaces using modern front-end technologies.
- Collaborate closely with full-stack developers, supervisors, and clients to ensure design consistency, technical feasibility, and alignment with project timelines.
- Lead UI/UX improvements and redesign existing systems to enhance usability, visual quality, and overall user experience.
- Propose creative ideas and design solutions to make systems more intuitive, engaging, modern, and user-friendly.
- Conduct QA testing to identify UI, functionality, and usability issues and ensure quality before deployment.
- Utilize GitHub and version control to manage and maintain front-end development work.
- Contribute to continuous system improvements by keeping interfaces aligned with current design trends and established project standards.
- Apply knowledge of back-end development when collaborating with developers and translating designs into technically feasible solutions.

BidaBoss Inc. | Pasig City, Philippines

UI/UX Designer (Intern) | Feb. 2026 - Apr. 2026

- Designed UI/UX for web-based systems and mobile applications using Figma, focusing on usability, visual consistency, and user-centered design.
- Designed the company's mobile application, creating high-fidelity screens and interactive prototypes for the application currently used by the organization.
- Developed functional prototypes to communicate user flows, interactions, and overall system experience to stakeholders.
- Worked on project-based client requirements by translating ideas and specifications into creative, user-friendly interface designs.
- Collaborated with the technical team and CEO during design reviews and incorporated feedback to ensure alignment with project requirements.
- Assisted in implementing approved designs into the front end, working alongside developers to maintain design accuracy and consistency.

PROJECTS

BidaBoss OMS (Online Marketplace System)

UI/UX Designer | Front-End Developer

- Led the UI/UX redesign of the BidaBoss Online Marketplace System, including its web platform and mobile application, while maintaining the company's visual identity.
- Redesigned the landing page using current e-commerce design trends, competitor research, and original creative concepts.
- Improved user journeys, navigation, and usability to create a more intuitive and engaging experience.
- Created and refined visual assets in Canva and translated approved Figma designs into functional front-end interfaces.

Technologies: Figma, Canva, HTML, CSS, JavaScript, jQuery, Tailwind CSS, Bootstrap 5, GitHub

BidaBoss Mobile e-Commerce Application

UI/UX Designer | Front-End Developer

- Designed and implemented responsive mobile interfaces for customer and seller experiences, focusing on intuitive navigation, usability, and visual consistency.
- Translated Figma designs and prototypes into functional Flutter interfaces across key e-commerce features and user flows.
- Collaborated with the development team to integrate front-end interfaces with existing backend services and APIs.
- Refined UI components and interactions to ensure a consistent, engaging, and user-friendly mobile experience.

Technologies: Figma, Flutter, Dart, flutter_bloc, GoRouter, GitHub

BidaBoss Supplier Management System

UI/UX Designer | Front-End Developer

- Took responsibility for the ongoing UI/UX improvement, redesign, and front-end development of the existing supplier management system.
- Reviewed existing interfaces and workflows to identify opportunities for improved usability, visual consistency, and overall user experience.
- Redesigned key system areas including the supplier dashboard, sales, inventory, orders, reports, and account management.
- Developed and refined responsive front-end interfaces based on approved designs, ensuring consistency across the existing system.
- Improved information hierarchy and navigation to help suppliers quickly access sales metrics, inventory data, order statuses, and other business information.
- Proposed and implemented design improvements to keep the system modern, intuitive, and aligned with current UI/UX practices.
- Collaborated with developers and stakeholders to ensure design improvements were technically feasible and aligned with business requirements.

Technologies: HTML, CSS, JavaScript, Bootstrap 5, jQuery, Chart.js, GitHub

Client Landing Page Projects — King’s Skincare for Men & iHome Speaker

UI/UX Designer | Front-End Developer

- Designed and developed two responsive product landing pages, creating modern, engaging interfaces aligned with the client’s brand identity and product goals.
- Created intuitive layouts, product-focused visual presentations, and interactive elements to enhance usability and user engagement.

Technologies: Figma, HTML, CSS, JavaScript, Bootstrap 5, jQuery, Chart.js, GitHub

EDUCATION

Pamantasan ng Lungsod ng Pasig Bachelor of Science in Information Technology (President’s Lister & Dean’s Lister)	2022 - 2026
Arellano University Andres Bonifacio Campus Senior High ICT (With Honors)	2020 - 2022

TECHNOLOGY STACK

Frontend: HTML, CSS, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap 5, jQuery
Backend: PHP, Python, Java, C++, VB.NET
Frameworks & Libraries: React, Next.js, Flutter
Databases & Backend Services: MySQL, Supabase, Firebase
APIs & Integrations: PHPMailer
DevOps, Deployment & Tools: Git, GitHub, Vercel, XAMPP, Visual Studio Code, Android Studio
AI Development Tools: ChatGPT, Cursor, Google Gemini
Data Visualization & Reporting: Chart.js, PhpSpreadsheet, TCPDF, FPDF/FPDI
Design & Prototyping: Figma, Canva, Adobe Photoshop, Blender
